CORN AND WHEAT STOCKS ABOVE A YEAR AGO WHILE SOYBEANS SLIP

Stocks of the four feed grains (corn, oats, barley, and sorghum grain) totaled 174 million tons on January 1, 1972, according to the Crop Reporting Board, 20 percent more than the 146 million tons a year earlier. Corn and sorghum grain led the increase; however, barley and oats were also higher.

Stocks of all wheat were 10 percent above a year earlier and the largest for January 1 since 1964. Durum wheat stocks were up 26 percent.

Soybean stocks were 6 percent below a year earlier and the smallest for January 1 since 1968. Flaxseed stocks were 12 percent below a year ago.

All wheat in storage on January 1, 1972 totaled 1,553 million bushels, 10 percent more than a year earlier and the largest January 1 stocks since 1964. Off-farm stocks, at 853 million bushels, were 3 percent below a year earlier but farm holdings, at 700 million, were record high and 32 percent above a year ago. Disappearance from all storage positions from October through December is indicated at 328 million bushels compared with 380 million a year earlier.

The Commodity Credit Corporation owned 372 million bushels, and had loans outstanding on an additional 486 million.

Durum wheat stocks in all positions on January 1, 1972 totaled 115.4 million bushels, 26 percent more than a year earlier and 4 percent above 2 years earlier. Farm holdings of 90.4 million bushels were 35 percent above last year and off-farm stocks were up 1 percent. Disappearance during the October-December quarter is indicated at 13.0 million bushels, compared with 14.4 million a year earlier.

Rye stocks in all storage positions on January 1, 1972 totaled 54.5 million bushels, 31 percent more than a year earlier and the highest since 1944. Off-farm stocks, at 33.1 million bushels, were 26 percent more than last year; farm stocks were up 40 percent. Indicated disappearance during October-December was 10.6 million bushels, compared with 7.7 million a year earlier. The Commodity Credit Corporation owned 23.7 million bushels of the total and had loans outstanding on 14.8 million.

Corn stocks in all storage positions on January 1, 1972 totaled 4,642 million bushels, up 24 percent from a year earlier and 8 percent above January 1, 1970. Off-farm stocks of 1,148 million bushels were 13 percent more than a year earlier, and farm holdings, at 3,494 million bushels, were up 28 percent.

Indicated disappearance during October-December totaled 1,561 million bushels, compared with 1,362 million bushels a year earlier. The Commodity Credit Corporation owned 144 million bushels and had loans outstanding on 760 million more bushels.

Oat stocks in all positions on January 1, 1972 totaled 936 million bushels, 3 percent more than a year earlier, and 6 percent above January 1, 1970. This is the largest January 1 oat stocks since 1959. Off-farm stocks, at 250 million bushels, were up 39 million bushels from last year and accounted for the increase in oats stocks. Farm holdings, at 686 million bushels, were 2 percent (16 million bushels) below last year.

Lighter feeding and reduced exports held disappearance from October through December to 150 million bushels, compared with 183 million in 1970. The Commodity Credit Corporation owned nearly 199 million bushels and had loans outstanding on 223 million more bushels.

Barley in storage January 1, 1972, totaled 393 million bushels, 3 percent more than a year earlier but 8 percent below January 1, 1970. Farm holdings, at 256 million bushels, topped January 1, 1971, by 7 percent but were 3 percent below January 1, 1970. Off-farm stocks, at 137 million bushels, were 4 percent less than a year earlier. Disappearance from all storage positions during October-December was 95 million bushels, down 13 million bushels from a year earlier. The Commodity Credit Corporation owned 36 million bushels of the total and had loans outstanding on 108 million more bushels.

Sorghum grain in storage January 1, 1972 totaled 715 million bushels, 16 percent above a year earlier, and the largest since 1969. Farm stocks accounted for 252 million bushels, an increase of 63 percent above last year, while off-farm stocks, at 463 million bushels, were only up 1 percent.

January 1 stocks indicate an October-December disappearance of 271 million bushels, sharply below the 328 million bushels used in the same 1970 quarter, and the 341 million used in 1969. Good fall pastures and a huge supply of corn reduced the need for heavy sorghum grain feeding.

The Commodity Credit Corporation owned 58 million bushels of total stocks and had loans outstanding on another 114 million bushels.

1/ Off-farm total plus farm stocks. October 1970 through October 1971 revised.

(Continued from page 2)

Flaxseed stocks in all storage positions on January 1, 1972 totaled 35 million bushels, 12 percent less than a year earlier. Flaxseed stored off farms accounted for 28 million bushels, 80 percent of total stocks. Farm stocks totaled 7 million bushels, 4.4 million below last January 1.

Current stocks indicate a disappearance during October-December of 5.5 million bushels, compared with 4.0 million bushels in the same quarter of 1970. Disappearance during the last half of 1971 is indicated at 10.5 million bushels from a supply of 45.5 million bushels (carryover of 26.8 million plus the 18.7 million bushels produced in 1971). Reported disappearance for this 6-month period included about 9.5 million bushels crushed. Exports were severely reduced with only 5 thousand bushels exported, compared with 2.9 million bushels in the last half of 1970.

The Commodity Credit Corporation owned 22.8 million bushels and had loans outstanding on an additional 5.6 million.

Soybeans: Soybeans in storage at all positions on January 1 totaled 887 million bushels, 6 percent less than a year earlier and the smallest for the date since 1968. Farm stocks, at 395 million bushels, were up 1 percent but off-farm stocks, at 492 million, were 11 percent below a year earlier. The Commodity Credit Corporation owned virtually no soybeans but had loans outstanding on 140 million bushels.

Stocks on January 1, 1972 indicate a September-December disappearance of 382 million bushels from a supply of 1,268 million bushels (carryover of 99 million bushels plus 1971 production of 1,169 million bushels), compared with 409 million bushels a year earlier. During the past 4 months, approximately 235 million bushels were processed for oil and about 150 million bushels were exported.

Off-Farm Grain Storage Capacity

Capacity of off-farm commercial grain storage in the Nation totaled 5,697 million bushels on January 1, 1972, slightly less than a year earlier. Seventeen States recorded declines while 25 registered increases.

In most States, changes in either direction were small. However, Minnesota recorded an 11 million increase, while Indiana and North Carolina each showed a gain of over 5 million bushels. The largest decline, 28 million bushels, was noted in Texas. Arkansas and Kansas followed, each with drops of 5 million bushels or more. In total capacity Texas continues to rank first and Kansas second; together they account for 27 percent of the Nation's total. The next four ranking States--Illinois, Nebraska, Iowa and Minnesota--have over 31 percent of total capacity.

Capacity data, by States, include all elevators, warehouses, terminals, merchant mills, other storages, and oilseed crushers which store grain, flaxseed, or soybeans. Capacity data exclude CCC bins, warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry beans or peas.
